

## **Product Description**

The Torino T2 Elbow Brace combines compressive knitted fabric with integrated silicone inlays to deliver targeted pressure and a gentle massage effect, helping to improve circulation, reduce swelling, and relieve pain or irritation. Its semi-rigid structure stabilizes the elbow joint and helps keep the joint in proper alignment when worn, reducing the risk of aggravating existing injuries. The adjustable strap allows customizable compression for a secure, comfortable fit. Designed for daily wear, the brace reduces strain on muscles and tendons during activity and supports recovery from overuse, injury, or chronic conditions, making it ideal for both preventive support and rehabilitation.

## **Indications**

- **Lateral and medial epicondylitis (tennis elbow, golfer's elbow)**
- **Joint effusion and swelling from arthritis or osteoarthritis**
- **Chronic inflammation after surgery or injury**
