

TORINO

T51 Shoulder Brace

Product Description

The Torino T51 Shoulder Brace provides compression and support to reduce pain, swelling, and irritation while improving circulation and mobility. Its breathable knit fabric encourages natural motion, and the removable semi-rigid pressure pad delivers targeted relief as needed. The brace stabilizes the shoulder joint and helps maintain proper alignment when worn, supporting safe movement, reducing strain on muscles and tendons, and aiding in recovery from overuse, injury, or chronic conditions.

Indications

- Shoulder pain and instability
- Swelling, irritation, or soft tissue strain
- Recovery after injury or surgery
- Support during physical activity
